/Hassan Kizou/ Supervisory Patent Examiner, Art Unit 2619			

Continuation of 11. does NOT place the application in condition for allowance because:

In regard to the 101 rejections, Applicant argues that a claim directed to "a medium storing program code" is statutory under 101. Examiner respectfully disagree. As was cited by Applicant, the Interim Guidelines specifically states that "when functional descriptive material is recorded on some computer-readable medium it becomes structurally and functionally interrelated to the medium and will be statutory in most cases".

In regard to the 103 rejections, Applicant argues that the limitation of "receiving a network packet and dividing the network packet into a plurality of m-packets, wehrein a size of each of the plurality of m-packets is equal to an element size, and wherein the element size is associated with a receive buffer" is not taught in the art of record (Potter and Brown), by citing Brown that each packet received within the turn around time interval is still "delivered, one-by-one, into one of the received buffers". Examiner respectfully disagrees. Potter discloses receiving a stream of network packet consisiting of a plurality of smaller packets over a TDM link. Brown discloses that receiving up to seven packets within a time interval and storing the packets, one-by-one, into one of the seven receive buffers. Thus the combination of Potter and Brown, by applying broad interpretation, teaches the limitation of "receiving a network packet and dividing the network packet into a plurality of m-packets, wehrein a size of each of the plurality of m-packets is equal to an element size, and wherein the element size is associated with a receive buffer".
